### Procedure

Phase A: Combine and slightly warm to 50C.

Phase B: Sift into phase A and blend well (propeller mixer or homogenizer).

Phase C: Add to phase A/B under good stirring. Homogenize shortly for an ultra smooth texture.

pH 6.5

### Properties

Helps in improving the appearance of aged skin and enhances the skin metabolism and delays skin aging. Helps for an even skin tone, and calms skin due to active ingredients in royal jelly.
