Method

Add phase A into a disinfected glass beaker and stir. Add phase B into another glass beaker and stir until uniform. Add phase B to phase A and stir well until uniform and smooth. Then add phase C one by one and stir well. Adjust viscosity with GelMaker EMU.

Properties

Non-oily, light skin lightening gel made with bearberry leaves extract and magnesium ascorbyl phosphate (skinwhite BLE). It inhibits skin cells to produce melanin pigments by inhibiting the tyrosinase activity by reducing melanin biosynthesis and effectively lightens age spots and dark skin areas.
