**Method**

Give phase A into a disinfected, heat-resistant glass jar and heat to (150oF/66oC) to melt the ingredients. Give phase B into a separate disinfected jar and stir with high speed to dissolve the gum, heat it to the same temperature. Add phase A to phase B and stir until it is a homogenous solution. After the temperature has dropped to 100oF/38oC add phase C and stir again.

**Properties**

Soothing cleansing milk (due to aloe, allantoin and vitamin B5) that will gently remove makeup and dirt leaving the skin clean, conditioned and moisturized. For normal to dry skin.
