Polyhydroxystearic Acid	polyhydroxystearic acid	Thickener	3.00	1.50	0.05

### Procedure

Phase A: add all ingredients into a heat resistant glass beaker and stir well. Heat to 90C/194F until all is melted, keep blending to avoid burning or settling, until smooth. Pour into lipstick mold at 80-85C.

### Properties

Lipstick with mainly beetroot extract pigment for a natural color. Fresh juicy looking color (not pastel).
