

Deodorant stick with Sage - 1222

Ingredient	Function	Percent	Wgt (g)	Wgt (oz)	Vol (tsp.)
Phase A					
Cyclomethicone (cyclotetrasiloxane, cyclopentasiloxane)	Emollient	54.50	54.50	1.92	10.90
Aluminum Chlorohydrate (aluminum chlorohydrate)	Antiperspirant	18.00	18.00	0.63	3.60
Cetearyl Alcohol (cetearyl alcohol)	Thickener	10.00	10.00	0.35	2.00
Apricot Kernel Oil (prunus armeniaca [Apricot] kernel oil)	Emollient	1.50	1.50	0.05	0.30
Talc (talcum)	Texturizer	5.00	5.00	0.18	1.00
Castor Wax (hydrogenated castor oil)	Texturizer	4.00	4.00	0.14	0.80
Synthetic Wax (synthetic wax)	Texturizer	2.00	2.00	0.07	0.40
Dimethicone 500 (dimethicone)	Emollient	3.00	3.00	0.11	0.60
Phase B					
Fragrance Coconut	Perfume	0.50	0.50	0.02	0.10
Sage Extract (glycerin, water, Salvia officinalis [Sage] extract)	Botanical	1.50	1.50	0.05	0.30

Method

Add phase A into a heat resistant vessel. Heat to 170F/75C until melted, blend well to uniform. Add phase B to phase A, blend well using an immersion stick blender or homogenizer. Pour hot into deodorant tubes.

Properties

Nice soft feel, glides on easily and feels good and dry. Essential oils can be used instead of "fragrance" in phase B.
