**Method**

1. Weigh all powders for phase A and grind in mortar and pestle - split blending into two parts 2. Add phase B and grind for the same time as phase A 3. Add phase C and repeat the same grinding operation as phase B

**Properties**

Light transparent powder to absorb excess oil and shine with the benefit of skin lightening action using our skinwhite msh and alpha arbutin. Package into a shaker jar, suitable for daily application. We recommend using a moisturizer with SPF when using any products with skin lightening action.
