Pumice Powder	Pumice	Abrasive	10.00	10.00	0.35
<b>Phase C</b>					
Fragrance Citrus Punch	Fragrance	Fragrance	0.20	0.20	0.01

### Procedure

Procedure:

- Phase A: Disinfect beaker and weigh all ingredients. Heat to 70 degrees Celcius.
- Phase B: Weigh in separate containers and keep it aside.
- After all the ingredients are melted and the required temperature is attained add phase B to phase A, and stir occasionally.
- When everything is mixed well remove the beaker from the heat source and cool to room temperature.
- Add the fragrance and blend well. Product consistency is thick, cream like.

### Properties

A natural scrub to be used before a bath. Gives a very soft and supple skin feel. Especially suited for dry hands and feet due to the addition of precious butters and squalane. May not need a moisturizer after wash-off, as emollients linger.
