### Procedure

Phase A: Blend Magnesium Aluminum Silicate with the water under high sheer. Pre-mix the propanediol and GelMaker® Hydro, then add to the above, blend under high sheer. Heat to 75C.

Phase B: Combine ingredients and heat to 75C.

Add phase B to phase A under sheer mixing. Homogenize for a short time.

Phase C: Add one by one, blending well.

ph 4.0

Additional information: Salicylic acid is know to exfoliate the skin and clear imperfections.

This active ingredient is an OTC ingredient and regulated by the FDA. This is a starter formulation, if you plan to market an OTC product, your facility must be registered with the FDA and proper product testing must be performed.

## Properties

---

Skin cream with salicylic acid that may help with sebum regulation and blemished skin. Multi-herb oily skin may be recommended for skin with high levels of sebum production, irritation, itching and loss of hydration. Squalane may help preventing moisture loss while restoring the skin's suppleness and flexibility.
