

Moisturizing Lip Balm with Bronze Sparkles - 1089

Ingredient	Function	Percent	Wgt (g)	Wgt (oz)	Vol (tsp.)
Phase A					
Petroleum Jelly (petrolatum)		46.40	46.40	1.64	9.28
Jobaba Oil, Organic (Simmondsia Chinensis [Jojoba] seed oil)		30.00	30.00	1.06	6.00
Microcrystalline Wax (microcrystalline wax)		6.00	6.00	0.21	1.20
Ozokerite Wax (ozokerite)		8.00	8.00	0.28	1.60
Lanolin Alcohol (lanolin alcohol)		4.00	4.00	0.14	0.80
Mica Bronze (mica [CI 77019], iron oxide [CI 77491])		3.00	3.00	0.11	0.60
Phase B					
Vitamin E Acetate (dl-alpha tocopheryl acetate)		1.00	1.00	0.04	0.20
Vitamin E Tocopherol (dl-alpha tocopherol)		0.20	0.20	0.01	0.04
Phenoxyethanol SA (phenoxyethanol, sorbic acid, caprylyl glycol)		1.00	1.00	0.04	0.20
Flavor Creme-de-Coco		0.40	0.40	0.01	0.08

Method

Add phase A into a glass beaker and heat to 167oF/75oC to melt the waxes, stir until uniform and all the waxes are melted. Remove from the heat and add phase B. Stir well, while still liquid, pour the mixture into small lip gloss pots or into lip balm tubes. You can use the lip gloss as soon as it has become solid. If you have to adjust the hardness of the lip balm you can do this by adding more of the ozokerite wax.

Properties

Petrolatum and jojoba oil are excellent moisturizing ingredients that prevent transdermal water loss (TEWL), they also soften dry lips and stay on the lips for a very long time. Lanolin Alcohol gives smooth and a soft feel.
