

### Texturizing Wax Pomade - 1389

Ingredient	Function	Percent	Wgt (g)	Wgt (oz)	Vol (tsp.)
<b>Phase A</b>					
Distilled Water (aqua)	Diluent	82.60	82.60	2.91	16.52
GelMaker Style (acrylates C10-30 alkyl methacrylate copolymer)	Styling Agent	3.00	3.00	0.11	0.60
Triethanolamine (triethanolamine)	pH Adjuster	0.30	0.30	0.01	0.06
<b>Phase B</b>					
CreamMaker BLEND (glyceryl stearate, PEG-100 stearate)	Emulsifier	4.00	4.00	0.14	0.80
Bees Wax (cera alba [bees wax])	Thickener	4.50	4.50	0.16	0.90
Triglyceride (caprylic / capric triglyceride)	Emollient	2.00	2.00	0.07	0.40
Cetearyl Alcohol (cetearyl alcohol)	Emulsifier	2.00	2.00	0.07	0.40
<b>Phase C</b>					
Provitamin B5 (d-panthenol, water)	Vitamin	0.30	0.30	0.01	0.06
Fragrance	Fragrance	0.30	0.30	0.01	0.06
Benzylalcohol-DHA (benzylalcohol, dehydroacetic acid)	Preservative	1.00	1.00	0.04	0.20

#### Method

Combine phase A in a heat resistant glass beaker and stir well. Test the pH it should be around 6.5-7. Heat phase A to to 75C/170F. Combine phase B in another heat resistant beaker and heat to the same temperature. Add phase B to phase A and maintain good agitation. Hold the temperature for 5min and stir. Slowly cool to 60C/140F and add phase C. Stir well. Pour into containers while still hot.

#### Properties

White, thick, buttery pomade gives the hair good definition, texture and control.
