72h Moisture	Saccharide isomerate	Active Ingredient	1.20	1.20	0.04
Phenoxyethanol	Phenoxyethanol	Preservative	0.90	0.90	0.03

Procedure

Phase A: Blend GelMaker® Hydro with glycerin, until dispersed, then add to the water phase and blend with high shear. Heat to 75C.

Phase B: Combine ingredients and heat to 75C.

Add phase B to phase A and blend well. Homogenize for a short time. Cool to 40C.

Phase C: Add to phase A/B, one by one, blend well. Cool to room temperature.

Properties

Light creamy moisturizer with barrier protection for the skin that needs the extra moisture and care. It gives a nice satiny skin feel. Contains top ingredients such as sheabutter, ceramides, 72hMoisture and CreamMaker® Stearate emulsifier.
