Mica Sand Gold Mica (CI 77019), iron oxide, titanium dioxide	Colorant	6.00	3.00	0.11	0.60

Method

In a heat resistant glass beaker weight and combine phase A ingredients. Add phase B and start stirring while heating to 75 C or until melted. Test a drop for shade and adjust if necessary. Pour hot into small pots.

Properties

Quick highlighter balm for the cheeks, lips and all the areas that need a little glow! Natural formulation, quick to make.
