Coco Betaine	coco betaine	Surfactant	5.00	12.00	0.42
Phase C					
Provitamin B5 (d-panthenol)	d-panthenol, water	Vitamin	0.50	1.20	0.04
Phenoxyethanol	phenoxyethanol	Preservative	1.00	2.40	0.08
Fragrance Coconut	fragrance	Fragrance	0.20	0.48	0.02

Procedure

Add phase A into a disinfected glass jar and mix well to dissolve the gum and EDTA. Add phase B to phase A while stirring gently to avoid too much foaming. Add phase C to phase A/B and stir again. Fill the face cleansing liquid into a pump foamer bottle. The bottle design will produce fine foam. (Can not be compared to dense white shaving foam from a pressurized can).

Properties

Mild skin cleanser for daily use with willow bark extract and provitamin B5 that act as astringent and soothing ingredients. The special foamer bottle provides a creamy foam.
