### Procedure

Phase A: Add into a disinfected glass beaker and blend well.

Phase B: Add phase B into another disinfected glass beaker and blend well.

Add phase B to phase A and blend very well until the gel is homogenous and thick (propeller stirrer or homogenizer can help).

Phase C: Add to phase A/B and blend well. If necessary adjust viscosity with GelMaker® EMU.

The cream-gel can be filled into treatment pumps, jars or tubes.

### Properties

Light gel that provides potent collagen stimulation and has strong moisturizing properties due to hyaluronic acid, oat protein and emollients. SkinTight (nannochloropsis oculata extract and pullulan) helps firming skin tissue
