

## Pigment Blend Earth Brown

### Specification Sheet

**Description:** Contains titanium dioxide mixed with a standardized blend of 3 different FDA approved high-purity pigments including iron oxide yellow, iron oxide red & iron oxide black. Thoroughly blended with machine blender to achieve ultrafine conformity. Brown powder, odorless. Insoluble, but easily miscible in water & oils.

**CAS:** 13463-67-7, 1332-37-2

**INCI Name:** Titanium dioxide, CI 77492 (iron oxides)

**Benefits:**

- Provides superior color purity and saturation
- Has outstanding dispersibility with no aggregate formation
- Can be blended with additional pigments of titanium dioxide to create more shades

**Use:** Can be tinted with titanium dioxide or additional pigments to create individual lighter or darker color shades, respectively. For external use only.

**Applications:** Basic makeup color for various makeup products including face powders, foundations, bronzing powders, makeup creams, lipsticks, blush.
