

Honeysuckle Blend

Specification Sheet

Description: Plant based liquid concentrate that has antimicrobial properties. Active components are isolated from herbs, namely Lonicera Japonica (Japanese Honeysuckle) and Lonicera Caprifolium. The concentrate is suitable for the antimicrobial protection of cosmetic and pharmaceutical applications.

CAS: 84603-62-3, 223749-79-9, 773218-5

INCI Name: Lonicera Caprifolium (honeysuckle) flower extract, Lonicera Japonica (honeysuckle) flower extract

Composition: Lonicera Caprifolium (honeysuckle) flower extract, Lonicera Japonica (honeysuckle) flower extract, water

Appearance: Light clear yellow liquid, moderate characteristic odor.

Benefits:

- 100% natural plant-derived product.
- Effectively inhibits growth of bacteria, yeast, and mold.
- Can be used in products for a preservative-free claim.

Use: Water-soluble for easy use. Add at the end of formula and mix very well. Can also be added to the water phase of a formula. Typical use level is 0.5-2%, pH range 5-8. For external use only.

Applications: All kinds of emulsions, surfactant systems (cleansers), and other products that contain water.

Solubility: Water-soluble

Storage: Store in a closed container at a dry place at room temperature.

Country of Origin: Tibet, Manchuria, Mongolia

Raw material source: Derived 100% from natural sources including Lonicera Caprifolium (Honeysuckle) flower extract (>70% - <75%) Lonicera Japonica (Honeysuckle) flower extract (>25% <30%)

Manufacture: Prepared by two-phase extraction: the first phase is done by using 0.1% (w/w) of 1.2% concentration of very mild natural plum fruit vinegar and water, and the second phase by carbon dioxide gaseous mixture and water and nitrogen gas (<0.5%).
