

Rose Flower Extract

Specification Sheet

Description: Wild Rose Extract made from rose buds and petals (Rosa Canina) dissolved in glycerin and water. Contains various volatile oils which have made them useful in tonics and anti-irritant solutions.

CAS: 56-81-5, 7732-18-5, 84696-47-9

INCI Name: Glycerin, Water, Rosa Canina Flower Extract

Composition: Glycerin, Water, Rosa Canina Flower Extract, Phenoxyethanol

Appearance: Medium to dark amber liquid, characteristic odor

Benefits:

- Has emollient, cooling, and tonic properties
- Can be used as aromatic ingredient in fragrances, creams, room deodorizers and sachets

Use: Add to formulas to the water phase. Typical use level 5 - 10%. For external use only.

Applications: Serums, creams & lotions, skin cleansers, sun- and after-sun care, sunscreens.

Solubility: Water-soluble

Preservation: Phenoxyethanol

Storage: Store in a closed container, in a dry, light protected area, at room temperature.

Country of Origin: USA

Raw material source: Rose buds and petals (Rosa Canina)

Manufacture: Prepared via a cold process to avoid potential loss of effectiveness heat processing can have. Created from naturally grown materials which are extracted first with a specified eluant to yield a concentrate. This concentrate is then dissolved in glycerin and water at a concentration of 20 % concentrate and 80% diluents.

Animal Testing: Not animal tested
