Method

Combine phase A in a heat-resistant beaker and heat to 70C/160F, stirring well to hydrate the Xanthan Gum. Combine phase B in a separate beaker and heat to same temperature. Add phase B to A, stirring well. Remove from heat. Cool to 40C/104F, and add phase C. Stir well to combine, then add phase D ingredients. pH about 4.5

Properties

Palmitoyl Isoleucine plumps, fills in wrinkles, and gives the appearance of smooth, youthful, hydrated skin. Shea butter moisturizes the skin and Squalane is light on the skin so you never feel greasy. Apply to the face, neck, and chest twice a day for hydrated skin that looks more youthful after a few weeks.
