Caprylyl Glycol EHG (Anti-microbial agent)	1.0	1.0 g / 0.0 oz	0	0
Fragrance White Tea (Fragrance)	0.2	0.2 g / 0.0 oz	0	0

Method

Add xanthan gum to the water/glycerin phase and mix well until hydrated.

Combine phase B ingredients and stir.

Add phase B to phase A under agitation until the light gel is smooth and uniform.

Add phase C, one at the time, stirring between ingredients. Fill into a dropper/or dispensing bottle.

Properties

Multifaceted approach to lighten & even tone for a smoother complexion. It inhibits melanin production and results in brighter skin complexion. It protects from internal & external stress factors and helps limit production of inflammatory biomarkers that contribute to melanogenesis.
