Collagen Protein, Hydrolyzed

Specification Sheet

Description: Unique collagen protein concentrate. Manufactured via an enzymatic hydrolysis process, mixture of straight chain polypeptide with an average molecular weight of 2,000 (range 1-4 KDa). Animal derived (bovine). Off-white powder, faint odor. Soluble in water.

CAS: 92113-31-0

INCI Name: Hydrolyzed collagen protein

Benefits:

Effective moisturizing properties

Can improve appearance of aged and blemished skin by supply of collagen which is a major component of the skin's connective tissue

Good film-forming and conditioning properties for damaged hair

Use: Add to the water phase of formulas and mix well to avoid the formation of lumps. Usual concentration 0.2-2%. For external use only.

Applications: Anti-aging and moisturizing lotions, creams, serums, sun care & after sun products, makeup products, hair conditioners, hair shampoos, hair masks.

Country of Origin: China

Raw material source: Edible gelatine

Manufacture: Collagen protein is made from edible gelatine through an enzymatic hydrolysis process.

Animal Testing: Not animal tested

GMO: GMO free (does not contain plant-derived components)

Vegan: No
