

Aloe Vera 10x Concentrate

Specification Sheet

Description: Pure natural liquid derived from the hollow interior of the leaves of the Aloe plant (aloe barbadensis Miller), consists of >75 components.

CAS: 94349-62-9, 24634-61-5, 532-32-1, 77-92-9

INCI Name: Aloe Barbadensis (aloe vera) leaf juice

Composition: Aloe Barbadensis (aloe vera) leaf juice

Appearance: Yellow-green colored liquid, light vegetable odor (discoloration will not affect efficacy)

Benefits:

- Contains amino acids, enzymes, hormones, minerals, saponins, sterols, sugar (starch), lectins and vitamins.
- Potent moisturizer, invigorating and soothing agent.
- Has been shown to improve the appearance of aging and dry skin.
- Skin feels more resilient and supple.

Use: Typical use level 1-10% (10 times concentrated compared to regular aloe vera solutions). The low pH of this aloe vera solution may, when added to your product, lower the pH and could cause emulsion separation. Use at low concentration only or add pH increasing ingredients such as TEA to stabilize. pH paper roll for measuring the pH is necessary when using TEA. For external use only.

Applications: All skin care products for dry skin, soothing creams & lotions, sun care and after-sun products, shampoos, and conditioners for dry hair.

Solubility: Water-soluble

Preservation: Potassium sorbate, sodium benzoate, citric acid

Storage: Store refrigerated (4-8°C / 39-46°F)

Country of Origin: USA, Mexico

Raw material source: Aloe barbadensis (aloe vera)
