### Procedure

Phase A: Add hyaluronic acid to distilled water and hydrate for 10min. Use a propeller mixer to blend then homogenize for a short time.

Add remaining ingredients of Phase A in order.

When GelMaker® HYDRO is added, gentle stir and hydrate, use a sheer mixer or homogenizer for a short time until solution is homogenous.

Phase B: Add and stir well.

pH 5.8

### Properties

Hydrates the skin after face cleansing in the morning. Its anti-aging properties helps to reduce fine lines, purifies the skin and may take care of lightly blemished skin. Improves the appearance of enlarged pores and moisturizes for a more rejuvenated look.
