4 FIRST AID MEASURES

Eyes: Contamination of the eyes must be treated by thorough irrigation with water, with the eyelids held open. Eventually a doctor (or eye specialist) should be consulted.

Inhalation: Upon inhalation of aerosol/vapor/dust: Take the patient into the fresh air; if there is difficulty in breathing, medical advice is required.

Skin: Take off immediately all contaminated clothing. Cleanse skin with plenty of water, soap, or other non-irritating cleansing agents. Seek medical attention if necessary.

Ingestion: Do Not Induce Vomiting. Never give anything by mouth to an unconscious person. If the product is swallowed, the patient must at once drink water repeatedly, if possible, with the addition of activated carbon. If the patient feels unwell, seek medical advice

5 FIRE-FIGHTING MEASURES

Suitable (and unsuitable) extinguishing media: May be combustible at high temperatures. Use appropriate media (water spray, foam, dry powder) for adjacent fire. Do not use CO2 as an extinguisher.

Special protective equipment & Wear self-contained breathing apparatus and full protective clothing, including eye protection

precautions for firefighters:	and boots. Fire residues and contaminated firefighting water must be disposed of in accordance with the local regulations.
Flash Points:	Not applicable.
Specific hazards arising from the chemical:	Not determined. See also Stability and reactivity section.

6 ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment & emergency procedures:	Avoid formation and deposition of dust. Do not try to clean up the leak without proper protective equipment. See section 8 for recommendations on the use of personal protective equipment.
Environmental precautions:	Avoid liquid release into sewers/public water/environment. Notify environmental authorities in case of leak.
Methods and material for containment and cleaning up:	Take up spilled product with dust-binding material or suitable vacuum cleaner. Fill into labelled, sealable containers. Dispose of absorbed material in accordance with the regulations.

7 HANDLING & STORAGE

Precautions for safe handling:	Avoid formation and deposition of dust. Keep container tightly closed and dry. Use good personal hygiene practice. Observe the usual precautionary measures required for chemicals with dust-explosive properties. Observe national regulations. See section 8 for recommendations on the use of personal protective equipment.
Conditions for safe storage, incl. any incompatibilities:	Store in original container in a cool, dry place. In filling operations take precautionary measures against static discharges. Standard storage shelf life is 60 months. Store away from incompatible materials (see section 10 for incompatibilities).
