

## Iron Oxide Brown

### Specification Sheet

**Description:** Color group: brown. Inorganic, high-purity pigment. Particle size range 0.3-5.0 micrometer. Mean particle size 1.42 micrometer.

**CAS:** 1317-61-9, 1309-37-1

**INCI Name:** CI 77499 (Iron oxides), CI 77491 (Iron oxides)

**Composition:** CI 77499 (Iron oxides), CI 77491 (Iron oxides)

**Purity Grade:** No purity grade applicable.

**Appearance:** Brown powder

**Benefits:**

- Provides superior color purity and saturation.
- Outstanding dispersibility, no aggregate formation.

**Use:** Can be tinted with titanium dioxide to create different beige shades. For external use only.

**Applications:** All kinds of color cosmetics, personal care products, soaps.

**Solubility:** Insoluble, but miscible in water & oils.

**Preservation:** Preservative-free

**Storage:** Store light-protected at a cool and dry place.

**Country of Origin:** France

**Raw material source:** Iron salts

**Manufacture:** Thermal decomposition of iron salts, precipitation of iron salts, and reduction of organic compounds by iron.

**Animal Testing:** Not animal tested.
