

Arnica Extract

Specification Sheet

Description: Also called Mountain Tobacco. Arnica Extract is made from the flower part & is primarily used in skin & hair care (external use). Contains 20% extract dissolved in water and glycerin.

CAS: 56-81-5, 7732-18-5, 68990-11-4

INCI Name: Glycerin, Water, Arnica Montana Flower Extract

Composition: Glycerin, Water, Arnica Montana Flower Extract, Phenoxyethanol

Appearance: Medium to Dark Amber Liquid

Benefits:

- Helps stimulating the skin for a fresh and rejuvenated complexion
- Widely used to soothe irritated skin and moisturize dry skin

Use: Water-soluble, added to water phase or after the formulation is completed (o/w emulsions). In w/o emulsions extract must go into the water phase. Typical use level 0.5-5%. For external use only

Applications: Face toners, cleansers, masks, skin lotions, creams

Solubility: Water-soluble

Preservation: Phenoxyethanol

Storage: Store in a closed container in a dry place at room temperature, away from heat and direct sunlight

Country of Origin: USA

Raw material source: Arnica Montana (Arnica flower), glycerin made of naturally derived oils

Manufacture: Prepared via a cold process to avoid potential loss of effectiveness heat processing can have. Created from organically grown materials which are extracted first with a specified eluant to yield a concentrate. This concentrate is then dissolved in glycerin and water at a concentration of 20 % concentrate and 80% diluents.

Animal Testing: Not animal tested
