

## Ceteareth-30

### Specification Sheet

**Description:** Non-ionic polyoxyethylene ether of higher saturated fatty alcohols (cetyl/stearyl alcohol). HLB value 16 (gives oil-in-water emulsions). Acts as an emulsifier, cleanser and wetting agent. It offers high solubility. Ceteareth-30 finds application in formulating moisturizers, lotions, hair conditioners, hair pomades and much more.

**CAS:** 68439-49-6

**INCI Name:** Ceteareth-30

**Composition:** Ceteareth-30

**Appearance:** White to slightly yellowish pellets

**Benefits:**

- Universal emulsifier to make o/w emulsions
- Compatible with all kinds of oils & active ingredients
- Very effective protective colloid that stabilizes all kinds of dispersed systems
- Can be combined with other emulsifiers
- Optimal use with gel-forming thickeners
- Compared to ceteareth-25 has a bit more gel-forming and thickening properties

**Use:** Typical use level 0.5-5% (up to 30% to make gel-like hydrates). For external use only.

**Applications:** All kinds of emulsion-based cosmetic products like creams, lotions (especially sprayable lotions), foundations, hair conditioners, pomades, sunscreen products.

**Solubility:** Dissolves in water & alcohol to form a colloid solution; can be mixed with mineral, vegetable or synthetic fats and oils.

**Preservation:** Preservative-free

**Storage:** Store in a closed container at a dry place at 104°F (< 40°C), protect from moisture

**Country of Origin:** Germany

**Raw material source:** Coconut/ palm kernel oil oils and ethylene oxide

---

**Manufacture:** Vegetable oils are processed to fatty alcohols (mainly cetyl alcohol & stearyl alcohol) which then are ethoxylated with ethylene oxide (no. 30 indicates number of ethylene oxide residues).

**Animal Testing:** Not animal tested

**GMO:** GMO-free

**Vegan:** Does not contain animal-derived components

**HS Code:** 3402130000

**California Prop. 65:** WARNING: This product can expose you to chemicals 1,4-Dioxane (CAS No. 123-91-1) <1 ppm and Ethylene oxide (CAS No. 75-21-8) <1 ppm, which is known to the State of California to cause cancer or reproductive toxicity.
