

Murumuru Butter

Specification Sheet

Description: Murumuru butter is the fatty part collected from the seeds of the Murumuru palm tree (*Astrocaryum murumuru*), native in Brazil. It is rich in oleic acid, making it a valuable ingredient for hair and skin-care products. Unrefined (virgin).

CAS: 356065-49-1

INCI Name: Murumuru (*Astrocaryum Murumuru*) Butter

Composition: Murumuru (*Astrocaryum Murumuru*) Butter

Appearance: Waxy solid, white to yellowish in color, nutty aroma

Benefits:

- Effective emollient with great moisturizing and smoothing properties. Improve skin elasticity.
- No tacky or greasy feel on the skin.
- Very useful in hair formulas due to its naturally glossy appearance and emollient repair effect.
- The butter's hydrophobic qualities assure that the moisture will be locked into the skin and hair during even humid conditions.
- Easily spreadable. Will melt on contact with skin.
- Non-comedogenic

Use: Melt before use, typical use level 3 - 100%. Can be used pure for skin treatments. For external use only.

Applications: Lotions, creams, hair care products, sun care & after sun products, lip balms, body butter, ointments.

Solubility: Oil-soluble, water-insoluble

Preservation: Preservative-free

Storage: Store in a closed container at a dry place at room temperature.

Country of Origin: USA

Raw material source: Seeds of the Murumuru palm tree (*Astrocaryum murumuru*)
