

Chaparral Extract

Specification Sheet

Description: Chaparral extract is made from the leaves of the Creosote bush (dwarf evergreen oak). Contains 20% extract dissolved in water and glycerin. The herb is well known for its antioxidant and purifying effects.

CAS: 56-81-5, 7732-18-5

INCI Name: Glycerin, Water, Larrea Tridentata (Chaparral) Extract

Composition: Glycerin, Water, Larrea Tridentata (Chaparral) Extract, Phenoxyethanol

Appearance: Light to medium amber liquid, characteristic odor

Benefits:

- Has purifying and antioxidant properties which are useful for oily and/or blemished skin.
- Best to be used in skin lotions, cleansers, and toners.

Use: Easily added to water phase or after the formulation is completed (o/w emulsions). For w/o emulsions extract must go into the water phase. Typical use level 0.5-5%. For external use only.

Applications: Face toners, cleansers, skin lotions/creams, products for blemished skin, sun, and make-up products.

Solubility: Water-soluble.

Preservation: Phenoxyethanol

Storage: Store in a closed container at a dry place at room temperature,

Country of Origin: USA

Raw material source: Larrea Tridentata (Chaparral), glycerin made of naturally derived oils.

Manufacture: Prepared via a cold process to avoid potential loss of effectiveness heat processing can have. Created from organically grown materials which are extracted first with a specified eluant to yield a concentrate. This concentrate is then dissolved in glycerin and water at a concentration of 20 % concentrate and 80% diluents.
