Method

Add Isopropyl Myristate to a heat-resistant beaker and heat to 50 - 60C. Add Silicone Resin very slowly, stirring well and adding more as it dissolves. Once all the resin has dissolved (this should take 5 - 10 minutes), remove beaker from heat. Add remaining phase A ingredients and return to heat, and heat to 70C to melt all of the waxes. Stir well. Remove from heat, and add phase B ingredients and stir well. Pour into lipstick mold and allow to fully cool.

Properties

A soft, comfortable matte lipstick that has great payoff and wearing time. Contains Mango Butter to moisturize the lips and Silica to give a silky feel. Color Blend : Lipstick example (darker red): (for 100/3.6oz grams of lipstick): 0.7g Mica Blackstar Red, 0.7g Sappan Red, 1.2g Mica Bordeaux, 3.4g Red 40 powder.
