

HydroComplex

Specification Sheet

Description: Blend of different moisturizing agents including low molecular weight moisturizers and humectants that mimic the natural moisture factor (NMF) in the skin.

CAS: 7647-14-5, 69-79-4, 50-99-7, 9067-32-7, 97-59-6, 28874-51-3, 77-92-9, 5949-29-1, 57-48-7, 56-81-5, 57-13-6, 5343-92-0

INCI Name: Fructose, urea, citric acid, sodium hydroxide, maltose, sodium PCA, sodium chloride, sodium lactate, trehalose, allantoin, sodium hyaluronate, glucose

Composition: Fructose, urea, citric acid, sodium hydroxide, maltose, sodium PCA, sodium chloride, sodium lactate, trehalose, allantoin, sodium hyaluronate, glucose, water, pentylene glycol, glycerin

Appearance: Clear colorless liquid, odorless

Benefits:

- Restores the moisture content of the skin and enhance the water retention capacity of the skin itself.
- Provides long-term moisturization (in clinical studies skin stayed moisturized for up to 72h)
- Creates a moisture reservoir.
- Suitable for skin and hair care products.

Use: Add as is to the water phase of the formulas below 60°C/140°F. Typical use level 1-5% for skin care products. For external use only.

Applications: All kinds of skin and hair care products such as creams, gels, lotions, and hair treatments.

Solubility: Water-soluble

Preservation: Sodium hydroxide

Storage: Store in a closed container at a dry place at room temperature.

Country of Origin: USA

Raw material source: Various natural components

Manufacture: Proprietary blend of multiple highly effective humectant agents of various structure and origin.
