

Anti-Wrinkle Cream with Peptides

(Sample Recipe for ICE Blend)

Anti-Wrinkle Cream with Peptides

Phase A	Weight %	For 100 g / 3.6 oz (by weight)
Hot Distilled Water (diluent)	69 %	69 g / 2.5 oz
Glycerin (humectant)	2 %	2 g / 0.1 oz / ½ tsp
ICE Blend (emulsifier/thickener)	8 %	8 g / 0.3 oz
Phase B		
Snake Peptide (active)	4 %	4 g / 0.15 oz / 1 tsp
SkinFirm Di-Peptide (active)	3 %	3 g / 0.11 oz / ¾ tsp
Matrixyl S-6 (active)	3 %	3 g / 0.11 oz / ¾ tsp
Phase C		
Octyldodecanol (emollient)	8 %	8 g / 0.3 oz / 2 tsp
Dimethicone 500 (emollient)	2 %	2 g / 0.1 oz / ½ tsp
Benzyl Alcohol/DHA (preservative)	0.8 %	0.8 g / 0.03 oz / 17 drops
Fragrance (optional)	0.2 %	4 drops

Method

Dissolve the glycerin in the water.

Add ICE Blend to the glycerin/water and mix well using a stick blender.

Once smooth and the temperature has dropped below 100F/40C add Phase B. Stir.

Add Phase C to Phase A/B and stir well until smooth.

The viscosity can be adjusted with ICE Blend, if the cream should be thicker add more ICE Blend and use a stick blender to make it lump free.

Properties

Peptides that help diminish the appearance of wrinkles from the inside and outside. Potent combination to fight aging, firms and targets these wrinkles and expression lines. Use twice daily for best results.
