

## Tara Gum Gel

### Specification Sheet

**Description:** This is a unique, three dimensional glycol-matrix delivery system that releases moisturizing molecules sequentially into the stratum corneum, resulting in a highly significant improvement of both immediate and long term skin hydration.

**CAS:** 7732-18-5, 56-81-5, 39300-88-4

**INCI Name:** Water, Glycerin, Hydrolyzed Caesalpinia Spinosa (tara) gum, Caesalpinia Spinosa (tara) gum

**Composition:** Water, Glycerin, Hydrolyzed Caesalpinia Spinosa (tara) gum, Caesalpinia Spinosa (tara) gum, Sodium Benzoate, Potassium Sorbate

**Appearance:** Viscous, pale-yellow liquid

**Benefits:**

- Captures and retains water into the skin for long-lasting hydration of the stratum corneum (top skin layer)
- Controls flaking for young-looking, healthy skin appearance
- The fluid gel helps stabilizing emulsions
- Has great skin-conditioning effect
- Suitable to be formulated into any kind of moisturizing cream, lotion or gel type formulation, facial cleanser, serum, for a high moisture level

**Use:** Add to water phase of emulsions. Typical use level: 2 - 10%. For external use only.

**Applications:** Anti-aging creams, serums, facial cleansers, facial masks, hair shampoos, conditioners.

**Solubility:** Water-soluble

**Preservation:** Sodium benzoate, potassium sorbate

**Storage:** Store in a closed container at a dry place at room temperature

**Country of Origin:** Spain

**Raw material source:** Seeds of the Tara Spinosa tree
