

CreamMaker® FLUID

Specification Sheet

Description: Effective, versatile, cold processable PEG-free nonionic oil-in-water emulsifier based on vegetable raw-materials. HLB value about 11. Has good compatibility with sunscreen filters.

CAS: 1338-39-2, 75798-42-4, 25637-88-1, 7732-18-5

INCI Name: Sorbitan Laurate, Polyglycerl-4 Laurate, Dilauryl Citrate, Water

Composition: Sorbitan Laurate, Polyglycerl-4 Laurate, Dilauryl Citrate, Water

Appearance: Clear yellow liquid, can become pasty at temperatures below 15°C/59°F.

Benefits:

- Easy-to-handle liquid emulsifier for making cold emulsions without the need of a co-emulsifier.
- Forms stable emulsions with all kinds of oils including mineral oils, vegetable oils, and synthetic esters.
- Gives light skin feel.
- Able to stabilize o/w lotions prepared in a cold process without a real homogenization step.
- Can also be used for hot processed creams and lotions.

Use: Add to oil phase of formulation, typical use level is 1.5-2.5%. Gives stable emulsions in the pH range of 5-9. For external use only.

Applications: Creams, lotions, and various other products requiring emulsification.

Solubility: Disperses in water.

Preservation: Preservative-free

Storage: Store in a closed container at a dry place at room temperature.

Country of Origin: Germany

Raw material source: Vegetable-derived glycerol and coconut oils.

Manufacture: CreamMaker Fluid is a proprietary blend of three different emulsifiers which are produced mainly with lauric acid as fatty acid moiety.
