

C12-15 Alkyl Benzoate

Specification Sheet

Description: C12-15 alkyl benzoate is a low-molecular weight ester of benzoic acid and C12-15 alcohols.

CAS: 68411-27-8

INCI Name: C12-15 alkyl benzoate

Composition: C12-15 alkyl benzoate

Appearance: Clear liquid, practically odorless.

Benefits:

- Versatile emollient ester suitable for use in skin care, sun care and color cosmetics.
- Can be used to improve feel, softness, and many other textural aspects.
- Offers excellent emolliency with added pigment-dispersing capabilities.
- Can be used as an effective solvent for sunscreens.

Use: Can be added to formulas as is, add to oil phase. Typical use level 1-30%. For external use only.

Applications: Lotions, creams, sun products, color cosmetics.

Solubility: Oil-soluble, <1% in water

Preservation: Preservative-free

Storage: Store in a closed container at a dry place at room temperature.

Country of Origin: USA

Raw material source: Benzoic acid and C12-15 alcohols

Manufacture: Produced from a reaction of benzoic acid and C12-15 alcohols

Animal Testing: Not animal tested.

GMO: GMO-free
