

## Ozokerite Wax

### Specification Sheet

**Description:** Mineral wax consisting of hydrocarbons, originally derived from veins in sandstones. Melting Point: 158-206°F (70-97°C).

**CAS:** 12198-93-5

**INCI Name:** Ozokerite Wax

**Composition:** Ozokerite Wax

**Appearance:** White to yellow pastilles, odorless

**Benefits:**

- Provides hardness, gel strength and consistency.
- Assures color uniformity in color cosmetics.
- Has emulsifying and emollient properties.
- Compatible with all kinds of mineral and plant oils and waxes.

**Use:** Add to heated oil phase of formulas. Typical use level 1-20% depending of product and desired viscosity. For external use only.

**Applications:** All kinds of stick cosmetics (lipstick, lip balm, concealers, deodorants), all kinds of emulsions (creams, lotions).

**Solubility:** Insoluble in water & alcohols, soluble in warm oils & other melted waxes.

**Preservation:** Preservative-free

**Storage:** Store in a closed container at a dry place at room temperature.

**Country of Origin:** USA

**Raw material source:** Petroleum wax

**Manufacture:** Ozokerite wax is made from blends of petroleum wax.

**Animal Testing:** Not animal tested.
